ALEJANDRO MUÑOZ LABRADOR

FULLSTACK | BACKEND | FRONTEND

ABOUT ME

I am a civil engineer who has successfully ventured into web development, gaining experience in various technologies such as React, Redux, JavaScript, SQL, Postgresql, Sequelize, Node.js, and CSS. As a backend developer, I have specialized in harnessing the potential of Node.js with TypeScript to create secure Lambda functions, fortified with JSON Web Tokens (JWTs). Furthermore, I have ensured the integrity of my projects through rigorous unit testing using Jest. Now, I am thrilled to join a dynamic team and contribute my technical expertise to develop innovative solutions.

SKILLS

- React
- Javascript
- Python
- MySql
- PHP
- Node Js
- AWS
- Typescript
- HTML
- CSS
- Postgresql
- GIT
- Redux
- SQL

LANGUAGES

Spanish - Native

English - Advance

EDUCATION

03/2022-04/2022
Frontend React Trainee bootcamp
Agile Engine

08/2021
Full Stack Web Development Bootcamp
Henry Bootcamp

2015-2020
Civil Engineer
University of the Andes

CERTIFICATES

TOEFL (iBT) Score: 80 (08/2021)

Listening: Advanced, Reading and Writing: High Intermediate ,
Speaking: Intermediate

WORK EXPERIENCE

Development Engineer
06/2022 - 02/2023 | Meridian Group SA

- Created RESTful APIs using AWS Serverless and Lambda functions.
- Implemented unit tests for each REST API using Jest.
- Authenticated each endpoint with JWT and API keys.
- Consulted the database using PostgreSQL and Sequelize.
- Worked under the Agile SCRUM methodology.

PERSONAL PROJECTS

Full stack developer-Food App-SPA
12/2020 - 01/2021

- Create different REST APIs using Express and Postgresql.
- Design the database schema.
- Create severals components in React utilizing global state with Redux and local states..
- Fetch an external API to populate the database and create the differents diets that the application render

Proyecto final Bootcamp
01/2022 - 03/2023

- Implemented the Agile SCRUM methodology and successfully developed the application with a team of 8 programmers.
- Contributed to the Backend team by creating relational database models in SQL and multiple endpoints for the Frontend team.

SOFT SKILLS

- Effective communication.
- Teamwork.
- Flexibility and adaptability.
- Critical thinking.
- Time management.
